

# Nutrition

## The inside story • Third edition

*Nutrition—The inside story* has come to be regarded as an excellent text for students of food and nutrition, as well as making a great addition to the bookshelf for the health-conscious reader. The comprehensive coverage of food and nutrition topics and issues over 356 pages is beautifully designed and illustrated. The new edition reflects recent developments in food and nutrition research, policy and technology, resulting in new material on, for example:

- the Australian Dietary Guidelines
- diet-related diseases and disorders
- Country of Origin labelling
- the Health Star Rating system
- food security
- biotechnology
- future foods
- digital marketing
- food waste

as well as the latest information on the impacts of nutrition on cancer, cardiovascular disease and the gut biome.
